

**Hillcroft Farms rams – 2009 drop
25% Poll Dorset/75% White Dorper
Photos Sept 2010 on arrival at Wonoka**

Hillcroft Farm notes from Hillcroft's studmaster:

HF 8874/09 - bwt-0.12 , wwt 4.4 pwwt 7.1 pfat0.6 pemd1.3 C+138

Raw data for 8874/09: WWT 53kgs. No other data available - EBV's are based on his parentage and siblings performance.

A strong robust ram with exceptional width through the hindquarters, good topline , good pasterns and feet, good mouth, clean poll average size testicles and a bit flat over shoulders. Didn't totally shed as a lamb as can be seen by the photo- about 90-95%

HF 9388/09 – bwt-0.05 wwt5.0 pwwt9.3 pfat-0.2 pemd0.9 C+157.

Raw data for 9388/09: weaning wt. 42kg pwwt 56.5kg pfat 2.50mm pemd 31.10mm

A medium size ram with excellent feet and legs , good mouth and clean poll, shed 100% as a lamb, large testicles and stands and walks wide behind.
